- Great for use with portable music players, gaming devices and PC

\$8.95 + GST
ITEM # AO-HEADK

What makes kid's headphones different?

There are obvious differences with kids headphones such as shape & size, however the most important feature is volume restriction. Prolonged exposure to high volume levels can adversely affect children's hearing. Standard headphones deliver volumes as high as 105db where as these kid-friendly ones feature a volume limiter of up to 85db for audio safety

LASER Ultra comfortable Earbud Earphones

- Super soft, ultra comfortable silicone earbud covers that help block out external noise for better sound quality
- No need for constant fiddling to keep earbuds from falling out, once these earbuds are in, they stay in
- 2 spare pairs of silicone earbud covers included
- Silicon coated cables to help avoid messy tangles
- Universal 3.5mm audio plug
